Mr. Bud Sawyer  
Production Manager  
Radio Station WDBS  
Hanover, New Hampshire

Dear Bud:

Enclosed is a typical copy of our program log, three copies of which are turned out daily. All billing is done from the engineer's copy which is signed with the time actual. In addition, the announcers sign their commercial copy with the time and date of presentation, providing a cross-check.

The Network is working on the central program office suggested at the convention, but as yet no one has been appointed as Program Manager for the net.

In my humble estimation, the convention at Princeton was certainly a great success. I think that we not only accomplished a great deal along the lines of station relations, but also everyone seemed to have had a good time. The results of the Executive Committee meeting on Saturday night pointed this out very clearly, since they plan to have more than one meeting next year.

I, personally, was quite pleased with the performance of one of Harvard's delegation. Their Business Manager, George Mealy, is on the ball and recognizes the problems of WHRB. I hope that the Net is able to provide enough push to bring Harvard out of the depths, as that outlet seems to be our only weak spot since Penn has risen out of the depths this past year.

The members of our staff are quite pleased with the idea of the dramatic show tape exchange for next year. It should certainly make the network more than a name as far as our listeners are concerned.

I am looking forward to a very successful year for the Network and its member stations.

Cordially yours,

David S. Robinson

DSR/fa

1. The first part of the report is a general introduction to the subject of the study. It discusses the importance of the study and the objectives of the research.

2. The second part of the report is a detailed description of the methodology used in the study. It includes information about the sample size, the data collection methods, and the statistical analysis techniques.

3. The third part of the report is a presentation of the results of the study. It includes tables, figures, and text describing the findings of the research.

4. The fourth part of the report is a discussion of the results and their implications. It compares the findings of the study to previous research and discusses the potential applications of the results.

5. The fifth part of the report is a conclusion and a list of references. The conclusion summarizes the main findings of the study, and the references list the sources of information used in the research.

6. The sixth part of the report is a list of appendices. These include additional data, figures, and tables that are not included in the main body of the report.

7. The seventh part of the report is a list of footnotes. These provide additional information about the study and the authors.

8. The eighth part of the report is a list of acknowledgments. These thank the individuals and organizations that provided support and assistance during the study.
